DEPARTMENT: PUBLIC WORKS
SUBJECT: PROGRESS REPORT FOR SEPTEMBER 2017
REPORT NO.: PW-2017-15
COUNCIL MEETING DATE: OCTOBER 10, 2017

ACTIVITY

1. Asphalt patching is winding down and will be finished up on a “weather permitting” basis. Although our patching program has made some huge improvements both on village streets and rural hard-tops we have already mapped out more spot repairs for next year.

2. 2017 Sidewalk repair and replacement should be finished up by the time of this report. Many dangerous sections of sidewalks have been replaced and in keeping with the Ontario Minimum Maintenance Standards staff will be performing our annual sidewalk inspection later this month. This will show us where we need to focus our sidewalk work next year to improve safety and accessibility.

3. Bridge work on the Pick Line (bridge 36) seems to be progressing well. At the time of this report, the cement deck had been poured and work is underway on new guard rails leaving waterproofing and Asphalt. This project should be finished up towards the end of October.

4. While on the topic of bridge repair; Bridge #6 on Vandecar line received $3000.00 dollars in damage on or about September 13th when someone crossed the bridge with an over-width piece of equipment. The damage was limited to the safety-mesh along both sides, it was damaged beyond repair and it will be replaced with simple railings. This incident was reported to police.

RECOMMENDATION

That Report PW-2017-xx Progress Report for September 2017 be received as information.
